DETAILED ACTION

This Office Action responds the Amendment received on March 26, 2004.

Priority

Applicants' statement regarding the priority is noted. Applicants indicate that the reference to the prior-filed applications in the specification have been deleted as well as the submission of a substitute ADS in which the previously cited priority claims are deleted (page 6, 3rd paragraph). No ADS was received. Therefore, the priority information contains in the ADS received on August 26, 2002 is in effect.

Additionally, Applicants are advised that if the priority claim is deleted from the specification as well as in a new ADS, the instant application would be subject to prior art which antedate the filing date of only the instant application.

The rejection of claims 1-3, 5-10, 14, 16-18, and 20 under 35 U.S.C. 103(a) as being unpatentable over Eisen et al. (PNAS, 1998, vol. 95, pages 14863-14868; IDS reference) in view of Andrade et al. (Bioinformatics, 1998, vol. 14, no. 7, pages 600-607; IDS reference) and Cocks et al. (U.S. Patent No. 6,607,879 B1, issued August 19, 2003, filed February 9, 1998), made in the Office Action mailed on January 2, 2004, is withdrawn in view of the Amendment received on March 26, 2004.

(Genome Informatics, 1999, vol. 10, pages 104-112; IDS reference) and Cocks et al. (U.S. Patent No. 6,607,879 B1, issued August 19, 2003, filed February 9, 1998), made in the Office Action mailed on January 2, 2004, is withdrawn in view of the Amendment received on March 26, 2004.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or

Art Unit: 1637

improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-14 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-10 of U.S. Patent No. 6,470,277 B1 (hereto referred to as '277 patent). Although the conflicting claims are not identical, they are not patentably distinct from each other because the invention of claims 1-14 of the instant application is, while different in wording, drawn to the same invention as that covered by claims 1-10 of the '277 patent in that both of the methods are computer implemented method which identifies a candidate genes via searching a group of databases, extracting annotative information for the retrieved genes, followed by the assignment of the reference (or publication as in the instant claims) score to the extracted annotative information for the determination of the candidate gene.

For the above reasons, instant claims 1-14 are obvious over claims 1-10 of the '277 patent.

Claims 16, 17, and 20 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 14-20 and 28-47 of copending Application No. 10/229,912 (hereto referred to as '912 application; its USPGP

Art Unit: 1637

provided). Although the conflicting claims are not identical, they are not patentably distinct from each other because the invention of claims 16, 17, and 20 of the instant application is, while different in wording, drawn to the same invention as that covered by claims 14-20 and 28-47 of the '912 application in that both of the systems identifies a candidate genes via searching a group of databases, extracting annotative information for the retrieved genes, followed by the assignment of the reference (or publication as in the instant claims) score to the extracted annotative information for the determination of the candidate gene.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Conclusion

No claims are allowed.
